Exceptional visibility

Ease into the spacious cab from either side and surround yourself in all-day comfort and convenience. Visibility in all directions is exceptional. Controls are logically placed, easy to use and within close reach. It’s a comfortable environment that makes your working day more enjoyable and more productive.

But it doesn’t stop there. Left and right hand doors, high capacity ventilation and a spacious interior, ensure you get the highest possible level of functional luxury in this tractor class. After your first few minutes of operating from the cab you’ll agree, John Deere quality is unmatched.

At a Glance –
• Exceptional visibility
• Easy to use controls
• Spacious, comfortable cab

Optional instruction seat can be folded out of the way when not in use.

Optional roof hatch with glass makes it easy to see loads that are normally out of sight when working in tight, low buildings.

Optional tiltable front windshield can be adjusted to improve air flow.

1 Instantly change direction with the electric left hand reverser while you keep your right hand on the controls. Loader work and complex headland turns are smooth and easy.

2 Our tilt/telescopic steering column adjusts to fit almost any operator perfectly.

3 The easy to read instrument cluster conveniently moves with the steering column.

4 The heating and cooling system is strategically placed within easy reach on the right hand console. The result is an unobstructed view out of the front windshield.

Optional FieldOffice provides removable storage for pens, notes, manuals and documents.
### At A Glance –
- 4.5 L and 6.8 L PowerTech engines
- HPCR engine delivers excellent performance
- Dual-stage charge air cooler and dual temperature cooling system improve fuel economy

### Reliable power
When you’re ready to start working, our field-proven 4.5 L and 6.8 L PowerTech engines are ready. Our 2-valve High Pressure Common Rail (HPCR) engines deliver rapid response and efficiency.

High torque and extra power comes from the dual-stage temperature cooling system and charge air cooler. This combination keeps fuel consumption and maintenance costs low.

It’s a total package of John Deere innovation and reliability that can help you keep your operational costs low.

Tillage work is no challenge for the robust power of the 6630 or 6930.
At A Glance –
• 3 main transmission choices with multiple options
• Comfortable, easy to use controls
• Left hand reverser on select models

PowrQuad Plus Transmission

Optional 16/16 PowrQuad Plus Transmission offers four powershiftable speeds in each of four fully synchronised ranges. Shifting between ranges can be done with the single-lever range shuttle and clutch.

Optional 24/24 PowrQuad Plus Transmission with up to 40 km/h top speed is available on all models. You get more gears in the main working range and more flexibility.

Quickly and easily change directions with the electric left hand reverser – standard equipment with the PowerReverser 16/16 and PowrQuad transmissions.

Three ways to harness the power

You can choose from one of three different transmissions to harness the power of your 6030 Series tractor.

• 6030 Series tractors: SyncroPlus (30k), PowerReverser (30k and 40k), PowrQuad Plus (30k and 44k).
• Open Station 6030 Series tractors: Syncro Plus (30k), PowerReverser (30k and 44k), PowrQuad Plus (30k and 44k).

Our exclusive SoftShift technology provides you with smooth gear changes, even under load. The engine and transmission communicate electronically to provide smooth, integrated shifts for enhanced operator comfort. SoftShift comes standard on both PowrQuad Plus transmissions.
New versatility for livestock producers

Livestock producers know the importance of having a dependable tractor. Our tractors are rugged, dependable and more versatile than ever.

Add a John Deere loader to move large bales, clean pens or load feed. An integrated left hand reverser makes it easy to quickly change direction regardless of the loader application you are performing.

But that’s not all. These tractors are also an ideal choice for towing, baling, spreading manure and all of the other tasks around your operation.

When it comes to making quality hay we make it simple. Our tractors, balers, sprayers and monitors are all John Deere built and work seamlessly together. Connections are trouble-free. Ask your local dealer about a complete John Deere hay-making solution that fits your operation.

At A Glance –

- Integrated left hand reverser and great visibility make loader work quick and easy
- Full-frame, long life design ensures years of dependable service

| Our tractor’s full-length frame manages the load, ensuring even distribution of the bucket to the engine and drive train components during operation.

| The optional joystick provides convenient operation and control right at the operator’s fingertips. With just a pull on the joystick you’re off and doing all of the tasks around your operation.

| Views out of the front window are unobstructed so you can operate your loader with confidence – especially in confined areas, barns or other buildings.

| The reliable, self-adjusting PowrQuad Plus main drive clutch ensures long lasting performance and smooth modulation engagements.
Stay one step ahead

The 103 kW (140 hp) 6830 and 114 kW (155 hp) 6930 are made to work on large livestock or arable operations. Put more power to the ground with the available new Triple Link Suspension (TLS) and enjoy a smooth ride. These tractors also come equipped with innovative hitches that use linear rockshaft control and hitch dampening to smooth out your ride during transport.

Optional electronic hitch sensing,* and a conveniently located remote on the fender, make implement connect quick and easy.

The in-cab PTO speed change system, makes it easy to move between implements.

*Standard in UK and Ireland

Triple Link Suspension (TLS) is a true suspension system, so front wheels follow the ground contours, it absorbs bumps hydraulically instead of passing them to the frame and cab. You maintain better traction and increase pulling power.

At A Glance –
• Two high horsepower models
• Available with new Triple Link Suspension
• Excellent visibility to the drawbar
• In-cab PTO speed change makes implement changes easy

We offer a number of guidance options for your tractor. Our most accurate system is hands-free AutoTrac Assisted Steering. Or, you can expand your investment in AutoTrac across additional platforms and choose the Universal AutoTrac system. It’s compatible with all of today’s best tractors, and even your existing John Deere tractors. Your local dealer can help you choose the guidance system that best fits your operation.

*Standard in UK and Ireland

You have a clear, unobstructed view to the drawbar from the cab. Hydraulic couplers are positioned out of your line of sight making implement connecting quick and easy.

As versatile as you need. The unique three-in-one hitch rail lets you use a variety of connections, from ball, wagon to piton. *A pick-up hitch is also available. These tractors can accommodate almost any system around.

Maintenance made simple

Servicing your 6030 Series tractor is easy. The single-piece tilt hood features two positions for easy engine, radiator and component access. A strong gas strut holds the hood steady in place at a 45 degree angle while you work. Or, if needed, you can override the strut and position the hood vertically, for maximum access.

Easy access to filters and service points help ensure that critical maintenance tasks are accomplished without difficulty. Plus, the engine oil change interval is 500 hours. That helps keep your cost of ownership low.

In addition, other vital components such as brakes and filters and service points help ensure that: 
• Multiple service-free components reduce cost of ownership
• Single-piece tilt hood for easy access to critical service points

Easy to service 
- 1 side of hood for easy access to critical service points
- 500 hour engine oil change interval
- Multiple service-free components reduce cost of ownership
